HORMONE RELATED CANCER WAIVER FORM

I, _____ voluntarily choose to use Bio-Identical Hormone Replacement therapy. Although this therapy has been approved for human use, I understand the risk of using any form of estrogen can increase my risk factor for estrogen related cancer. If I have a personal or family history of any type of cancer, I understand that I am at increased risk of developing cancer, as well as recurrence of my previous cancer whether I use hormone replacement or not. I understand that the use of Bio-identical hormone replacement may increase my risk for possible Estrogen and Testosterone related cancers. I have carefully read the Hormone Related Cancer Waiver Form and still wish to proceed with Hormone Replacement Pellet Therapy.

I understand that I need to continue with my personal medical doctor's routine visits and testing including mammograms and PAP smears when appropriate.

I release Gregory W. Childrey, M.D. and his employees from any liability should any hormone related cancer occur in my case.

BIO-IDENTICAL HORMONAL THERAPY FEMALE TESTOSTERONE HORMONE ACKNOWLEDGEMENT INSERTION FORM

Although this therapy has been approved for human use, there are few doctors who currently administer estradiol and testosterone pellets in the United States. I realize that this is not the usual and customary means of hormone replacement.

I understand that bio-identical hormonal Testosterone will be inserted under my skin to achieve a steady delivery of natural testosterone hormone into my blood system. Testosterone is also made by my body, though levels decrease with age and in certain medical conditions. I realize that testosterone can increase my energy, my libido, and increase my sense of well being.

I realize in the past that male and female athletes have abused testosterone. When they took large quantities of synthetic testosterone, they may have incurred heart problems, elevated cholesterol, and other health problems. However, low dose, non oral, natural testosterone that is used in bio-identical hormonal therapy has NOT been associated with these problems.

As this procedure is often an expense not covered by insurance benefits, I understand payment is due in full at the time of service. We do not participate with any type of insurance.

My signature certifies that I have read the above acknowledgement. I have been encouraged to ask any questions regarding bio identical hormonal therapy. My questions have been answered to my satisfaction.

BIO-IDENTICAL HORMONAL THERAPY FEMALE ESTRADIOL & TESTOSTERONE HORMONE ACKNOWLEDGEMENT INSERTION FORM

Although this therapy has been approved for human use, there are few doctors who currently administer estradiol and testosterone pellets in the United States. I realize that this is not the usual and customary means of hormone replacement.

I am to have bio-identical hormonal estradiol inserted under my skin to achieve a steady state of estrogen in my body. Estradiol is an estrogen that is naturally made by my body. Its levels decrease with certain medical conditions and during ovary failure in menopause. The potential benefits and risks of bio-identical estradiol as they are currently understood have been explained to me. I realize that estrogen may eliminate my mood swings, anxiety and irritability, among many other low estrogen symptoms.

I understand that bio-identical hormonal testosterone will be inserted under my skin to achieve a steady delivery of natural testosterone hormone into my blood system. Testosterone is also made by my body, though levels decrease with age and in certain medical conditions.
